

I am for the changes proposed, but another aspect needs to be addressed in regard to the current and oncoming infusion of new blood into the HF Phone arena.

More enforcement of current regulations, since it appears that the operators in the region feel they are immune from any regulatory control.

If a operator is on a 2 Meter or 70 Cm repeater the control operator can ban them from use because of abuses.

So who will ban the abusers on the HF Phone region ??????

Someone needs to fix it because it is broke....

I will stay with my Tech License
